Stuart Davis from R. Moore & Sons said, "In April 2015 R. Moore & Sons invested in a 100KW Solar system as part of their broader costs and environmental footprint reduction. We have also developed a treatment plant to reduce the impact of waste water. The new waste water plant provides a higher quality of treated water that is reused several times in our cleaning process. This helps to reduce water usage and the impact of waste water."

Tracie Barker from WA Treeworks said, "WA Treeworks specialises in delivery of arboricultural services. Our goal is to identify client objectives, create innovative and viable solutions that set the standard for safety and efficiency within the tree care industry and seek out opportunities where we can minimise environmental impact and make a positive contribution within the community."
