## It's easier being green, say experts

BUSINESS owners seeking to embrace green energy were full of questions at the recent Green Energy 'Ask an Expert' Forum in Belmont.

Attendees were taught tips for low and no-cost initiatives to reduce energy, how to light their business, and understand energy and peak oil issues, by the textile, clothing and footwear (TCF) advisory panel.

The event was part of the De-

signed Innovation festival, which runs until May 30, and features a number of seminars and webinars aimed at educating Australian business owners.

Attendees were also given the opportunity to sign up to the TCF Australia's range of green fashion sustainable webinars and networks.
